TRANSFORM FOR TOMORROW
WHAT’S WORKING IN SCHOOLS NOW?

A virtual series for School Leaders and Superintendents

You’re more than one month into this very different 2020-21 school year. You’ve adapted remarkably to new ways of preparing your teachers, educating your students, and supporting your parents and caregivers.

So, what’s working well? And what’s not? This virtual series presents opportunities to share and learn from one another how our schools might, together, prepare for what comes next, no matter what tomorrow brings.

Won’t you join us?

A collaboration with

**WHEN:**

Thursdays from 7:00-7:30 pm
October 7 through November 5
All sessions are FREE!

**WHERE:**

Sessions are held virtually via Zoom.us

**HOW:**

Delivering instruction to students through interactive learning and engaging students using technology
School districts are using a myriad of platforms to teach their students virtually, and this first series session will examine strategies that help to make learning fun and engaging for students. The school leaders in this session will share what they have learned and provide specific strategies that are being used in their virtual classrooms.

How to build relationships and communicate effectively with students, parents, and caregivers in this new learning environment
COVID-19 has changed the way school districts have used technology to communicate with their stakeholders. The second series session will discuss innovative practices school districts have used to keep the public informed as well ways in which virtual communication experiences have changed practices for teachers, parents, and caregivers.

Providing professional development to your staff and strategies to help your colleagues
Teacher and district professional development is a critical part of school operations. This third series session will examine ways that school leaders are providing professional development in a virtual environment. Virtual experiences will change how professional development is delivered now and in the future.

How curriculum is changing in schools and essential literacies we should be teaching students K-12
How will COVID-19 make school leaders rethink what are essential literacies that students will need to learn? In the fourth series session, presenters will address what their school districts are doing to rethink and reimagine curriculum K-12 for the future, and they will provide specific examples of what they are doing to prepare students for their future.

How learning will look in the future and how this experience will impact how schools educate students
This Transform for Tomorrow series will conclude with the fifth session that will focus on a futuristic look at what school leaders will need to analyze to prepare schools for the future of learning in a Post COVID-19 world. The school experience for students, teachers, families, and caregivers has changed, and the presenters will discuss how the changes will impact the future of learning and traditional schools as we know them.
