

The **Professional Learning Collaborative** is a regional working group comprised of individuals and organizations who seek to connect professional learning providers in southwestern Pennsylvania and northern West Virginia. We help providers collaborate to meet regional objectives too large for one organization to undertake alone.

PROFESSIONAL LEARNING

Has the potential to improve the practices and skills of every educator

Works best when it is relevant to an educator's experiences and needs

Isn't just for in-school educators

OUR VISION

Every educator in our region has access to high-quality, innovative, peer-to-peer professional learning opportunities

CURRENT PROJECTS

Professional Learning Think Tank: An open, year-long reflection on professional learning in the region. Each of the four sessions will tackle a different theme:

- **Motivation:** Reconnect to the "why" of your work as a provider of professional learning.
- **Collaboration:** Partner on a professional learning "small bet" with workgroup members.
- **Inspiration:** Learn from local leaders and see how they're transforming student experience through innovative professional learning.
- **Creation:** Using what you've learned, help build the next iteration of a vision for the future of professional learning in our region.
