

NATIONAL MOONSHOT

GRANTS

Bold ideas for the
future of learning

powered by

with support from

On May 8-9, hundreds of educational leaders convened in Pittsburgh, Pennsylvania for *Forge Futures*, a national summit on community-wide learning ecosystems.

Together, we dreamed up a future where learning is more engaging, relevant, and equitable for young people. We prototyped actions that can be taken today to catalyze movement toward this future.

At the conclusion of the summit, we launched National Moonshot Grants to bring a number of these prototypes to life in sites across the country and world.

THE OPPORTUNITY

Participants of Forge Futures are invited to apply for National Moonshot Grant funding that supports the testing of bold ideas. Bold ideas push the limits of what is possible and lead to valuable new insights and shifts. Applications should aim to test prototypes presented on May 9th in real-life settings.

A PREFERRED FUTURE OF LEARNING

National Moonshot Grants challenge applicants to envision their preferred future of learning—what they hope learning will look like 10 to 20 years in the future. Applicants are asked to paint a picture of their preferred future by identifying its key attributes and distinguishing it from the present.

FUNDING PRIORITIES

Successful applications will:

- Prioritize bold experimentation.
- Incorporate collaboration with multiple organizations.
- Lift up marginalized populations.
- Explicitly tie to ideas surfaced at Forge Futures.

ELIGIBILITY

To be eligible for a National Moonshot Grant, applications must:

- Be submitted by the person who was in attendance at Forge Futures.
- Come from a charitable or non-governmental organization. U.S.-based applicants must be registered, 501(c) (3) tax-exempt organizations. You may have other entities and individuals in your application, but the applicant must be one of the entities listed above.

2024 TIMELINE

Applications

5/16: Application open

6/28: Application closes

Information Sessions

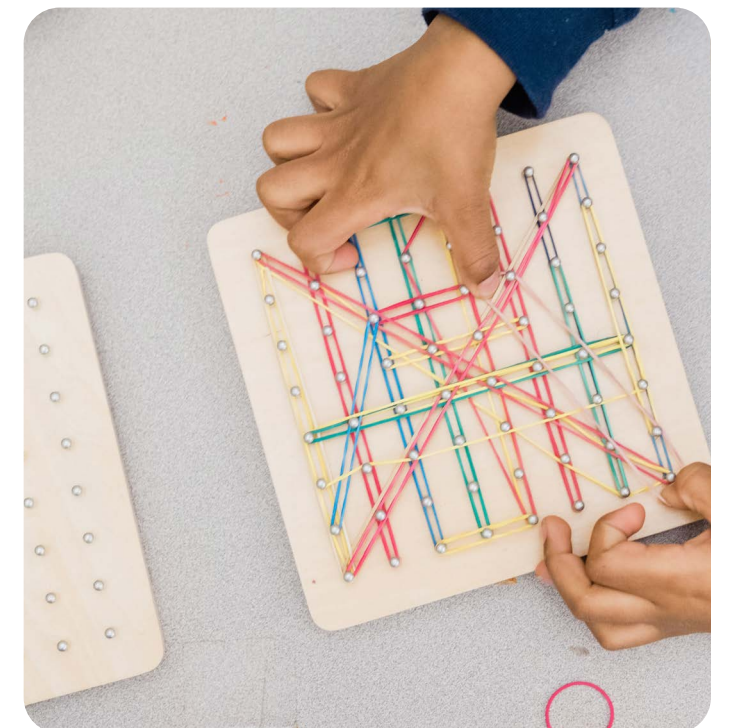

5/28: 2:00 pm (EDT)

6/4: 11:00 am (EDT)

FUNDING

Applicants can request up to \$50,000 in funding to support the implementation of their idea.

- Up to 3 awards to applicants based in southwestern Pennsylvania
- Up to 7 awards to applicants based anywhere in the United States
- Up to 1 award to applicants worldwide

About Forge Futures

Presented by Remake Learning and AASA, Forge Futures is a national summit that brings together America's most enterprising superintendents and educational leaders to author the next chapter for public education, integrating the possibilities presented by local learning ecosystems.

About Remake Learning

Remake Learning sparks engaging, relevant, and equitable learning practices in support of young people navigating rapid social and technological change. What began as an informal gathering of just a handful of people has flourished over two decades into a thriving multi-state ecosystem comprising hundreds of institutions, spanning schools, museums, libraries, early learning centers, out-of-school program sites, and more.
